Professional Summary

A Backend Web Developer specializing in Laravel and PHP, with practical experience in developing full-stack web applications and managing databases. I have worked on real-world platforms such as social media networks and task management systems, demonstrating strong problem-solving skills and a deep understanding of frontend technologies like HTML, CSS, and JavaScript.

I am passionate about developing high-performance and scalable solutions that meet both user needs and business goals. I have experience in building full-stack applications, handling everything from requirement analysis and system architecture to deployment and maintenance. My ability to collaborate with cross-functional teams ensures seamless integration between frontend and backend services.

Additionally, I focus on performance optimization, including query optimization, caching strategies, and load balancing. I am also well-versed in security best practices, implementing authentication mechanisms like JWT and OAuth.

I am committed to continuous learning, staying up-to-date with modern technologies and frameworks, and constantly improving my skills to deliver efficient and scalable software solutions.

Technical Skills

- Backend Development: Laravel, PHP, MySQL, RESTful APIs, Data Structures
 - Frontend Development: HTML, CSS, JavaScript
 - Programming Languages: C++, Python, Dart
 - Tools & Technologies: Git, GitHub, Breeze, JWT (Authentication Token)
 - Database Management: Database design, query optimization, data management
-

Work Experience

Backend Development Intern

MAPs Organization | 6 months (Ongoing Internship) | Feb-25-2025 -

Intern at STH Company

Developed web applications using the Laravel framework.

Designed and managed databases using MySQL.

Implemented APIs to enable interaction between frontend and backend.

Key Projects

1. **Social Media Platform (Similar to Facebook):**
Features: Post sharing, photos, comments, search
 2. **Platform Connecting Craftsmen with Home and Professional Issues:**
Features: Account registration, problem posting, offer reception, service execution, chat, notifications
 3. **Auction Management Platform:**
Features: Auction creation, bidding, auction management
 4. **Platform for Automating Processes Between Pharmaceutical Warehouses and Pharmacies:**
Comprehensive system covering drug supply, distribution, financial account monitoring, statistics, debt tracking, and order management
 5. **Catalog Management System:**
Add, edit, and delete items, with the ability to import/export via PDF and Excel for easy data upload and secure data handling
 6. **Warehouse Management Project (In Development) with a Team**
-

Achievements & Personal Projects

- Developed full-stack web applications using Laravel and MySQL.
 - Built APIs to enable system interaction.
 - Optimized database performance through query optimization and effective structure design.
-

Education

Technical Institute for Computing
Second Year (Since Oct-11-2023 - Present)

Soft Skills

1. Ability to plan, research, and find technical solutions
 2. Adaptability to technical challenges: learning new technologies and keeping up with changes in the programming world
 3. Data-driven analysis and decision-making
 4. Planning, organization, and time management
-

Languages

- Arabic: Native
- English: Intermediate
