Professional Summary

"A seasoned **Backend Web Developer** specializing in **Laravel** and **PHP**, with practical experience in developing full-stack web applications and managing databases for real-world platforms such as social media networks and task management systems. I possess strong problem-solving skills and a deep understanding of frontend technologies, including **HTML**, **CSS**, and **JavaScript**.
In addition, I have a passion and emerging practical experience in **Machine Learning** and **Data Science**, with a specific focus on **Natural Language Processing (NLP)** and **Deep Learning**. I'm proficient in building, training, evaluating, and optimizing **Machine Learning models** using **Python**, and familiar with both **scikit-learn** and **Hugging Face Transformers** for developing advanced language models. I am committed to continuous learning and staying updated with the latest technologies to deliver innovative and effective software solutions."

Technical Skills

Programming Languages: **Python** (highly proficient in Machine Learning and Natural Language Processing), **PHP**, **C++**, **Dart**, **JavaScript**.

Backend Development: **Laravel API**, **PHP**, **MySQL**, **RESTful APIs**, **Data Structures**.

Machine Learning & Artificial Intelligence:

- **Natural Language Processing (NLP):**
 - **Hugging Face Transformers Library:** Practical experience with Large Language Models (LLMs), Fine-tuning, utilizing `pipeline`, `Tokenizer`, and `Model` components.
 - **Core NLP Concepts:** Tokenization, Embeddings, Self-Attention.
- **Deep Learning:** Foundational concepts, Model Training, **TensorFlow**.
- **Core ML Libraries:** **scikit-learn** (highly proficient in Classification, Regression, Clustering), **Pandas**, **NumPy**, Hugging Face Datasets, Hugging Face Evaluate.
- **General ML Concepts:** Supervised Learning, Unsupervised Learning, Data Preprocessing, Feature Engineering, Hyperparameter Tuning, Cross-Validation, Model Evaluation, Pipelines.
- **Algorithms:** Linear and Logistic Regression, K-Nearest Neighbors, Random Forests, Gradient Boosting, K-Means.

Frontend Development: **HTML**, **CSS**, **JavaScript**.

Tools & Technologies: **Git**, **GitHub**, **Breeze**, **JWT** (Authentication Token).

Database Management: **Database Design**, **Query Optimization**, **Data Management**.

Work Experience

Backend Development Intern | 7 MAPs Organization

- September 2024 – April 2025 (Completed)

AI (ML+DL) Intern | Education Without Borders (MIDAD) Organization

- May 2025 – January 2026 (Ongoing)

Intern | STH Company

- April 2025 – Present

During these internships, key responsibilities included:

- Developing web applications using the Laravel framework.
 - Designing and managing databases with MySQL.
 - Implementing Application Programming Interfaces (APIs) to enable interaction between frontend and backend.
-

Key Projects

1. Social Media Platform (Similar to Facebook):

Features: Post sharing, photos, comments, search

2. Spam/Ham Classifier using Transformers with 90% Accuracy

3. Platform Connecting Craftsmen with Home and Professional Issues:

Features: Account registration, problem posting, offer reception, service execution, chat, notifications

4. Auction Management Platform:

Features: Auction creation, bidding, auction management

5. Platform for Automating Processes Between Pharmaceutical Warehouses and Pharmacies:

Comprehensive system covering drug supply, distribution, financial account monitoring, statistics, debt tracking, and order management

6. Catalog Management System:

Add, edit, and delete items, with the ability to import/export via PDF and Excel for easy data upload and secure data handling

7. Warehouse Management Project (In Development) with a Team

Achievements & Personal Projects

- Developed full-stack web applications using Laravel and MySQL.
 - Built APIs to enable system interaction.
 - Optimized database performance through query optimization and effective structure design.
 - Built and trained specialized Machine Learning models using scikit-learn and Hugging Face Transformers.
-

Education

Technical Institute for Computing

Second Year (Since Oct-11-2023 - Present)

Soft Skills

1. Ability to plan, research, and find technical solutions
 2. Adaptability to technical challenges: learning new technologies and keeping up with changes in the programming world
 3. Data-driven analysis and decision-making
 4. Planning, organization, and time management
-

Languages

- Arabic: Native
- English: Intermediate
